

PYREX NOZZLE GAS SAVER KITS - THE CLEAR ADVANTAGE

Pyrex gas nozzles are used in applications where visibility can be an issue such as inside corners, inside pipe, around tubing, etc. Even in general applications the benefit of total visibility makes for superior welding results. The replaceable mesh screen tungsten adaptor diffuses the shielding gas providing a columnar flow pattern for consistent and superior gas coverage and allows for the tungsten to be extended up to six times the tungsten diameter. Saving of up to 40% of shielding gas consumption translates into significant cost savings.

- Clear Pyrex Nozzle for excellent visibility
- Push on Pyrex Nozzle
- Save up to 40% gas consumption
- Low cost replaceable Screen Adaptor
- Tungsten stick-out up to 6 times tungsten diameter
- Fits most standard silicone rubber torch bodies
- Kits supplied in convenient clip down plastic case
- Individual parts available.
